Superior Automotive Battery Solutions in Australia

Energised Batteries[®] maintenance-free products are designed to deliver robust power and exceptional battery life across various applications from standard passenger vehicles to 4WDs, electric cars (EVs), hybrid auxiliary systems, stop-start with Enhanced Flooded Battery (EFB), and Absorbent Glass Mat (AGM) technology, as well as trucks, buses, and heavy-duty earthmoving equipment.

Our batteries, including the Hybrid Auxiliary and ISS Stop Start series, provide seamless OEM integration, superior performance, and extended lifespan, all backed by a local Australian warranty. Energised Batteries is your trusted partner for top-quality and cost-effective battery solutions to keep your vehicles operating smoothly on the road. Rest assured that all Energised batteries come with a factory-backed warranty and the backing of a local Australian-owned business.

Energised Batteries®

STOP START SERIES AGM & EFB TECHNOLOGY

Stop Start Series are engineered to surpass OEM specifications, making them the ideal replacements for vehicles with the Stop Start ISS function. These AGM & EFB batteries are critical in the mini-cycling required to deliver rapid recharging between repeated engine starts and the extra power necessary to run your vehicle's onboard electrics whilst the engine is not running.

When it's time to replace your Stop Start battery, whether it's an AGM or EFB battery, choose the dependable and budget-friendly Energised AGM & EFB series Battery.

Key Features

Seamless OEM Integration

Energised Batteries strives to exceed OEM specifications, guaranteeing a hassle-free installation process without needing modifications.

Superior Performance

Our Energised® ISS AGM & EFB Batteries supply steady and reliable power for the mini-cycling required to deliver rapid recharging and the extra power necessary to run your vehicle's onboard electrics.

Extended Lifespan

Designed to meet the demanding requirements of stop-start cars, our ISS batteries boast an extended lifespan, minimising downtime and maximising reliability.

Superior Cycling, AGM & EFB Technology

Our AGM & EFB Hybrid Auxiliary Batteries surpass the service and cycle life of standard Maintenance-Free (MF) Batteries, ensuring dependable performance.

Green Energy and Recyclability

Energised Batteries® lead-acid batteries consist of 99% recyclable components, aligning with environmentally conscious practices for sustainable energy solutions.

Local Australian Warranty

Backed by a local Australian-owned and operated business, Energised Batteries® offers a warranty that safeguards your investment and provides readily available local support.
